

## VBM Orthopaedic Polymers

Development of Injection Molding for PEEK-OPTIMA® (an advanced biomaterial from Invibio Biomaterial Solutions).

VBM Orthopaedic Polymers ,specializes in contract Injection molding under laminar flow for the orthopedics and dental.

PEEK-OPTIMA® polymer is a biomaterial for long-term use in the human body. Radiolucency, excellent mechanical properties, relative ease of device fabrication by injection molding and demonstrated biocompatibility have helped make this material become an important alternative to metals.

Thanks to processing know-how in the injection molding of bioresorbable PLLA, implantable PMMA, and design, manufacture of molds, VBM Orthopaedic Polymers confirms its position of reliable contract partner close to you in implant development.
